

Ontario Renal Plan 3

2019–2023

ontariorenalnetwork.ca/renalplan

Person-Centred

STRATEGIC OBJECTIVES:

Foster a kidney care system that supports patients' mental health

Enhance the quality of communication among patients, caregivers and healthcare professionals along the entire kidney care journey

Expand the use of patient-reported experiences and outcomes to drive improvements

Promote and enable dialysis at home

Strengthen early identification and support for patients who would benefit from a palliative approach to care

Safe

STRATEGIC OBJECTIVES:

Drive improvements in medication management

Equitable

STRATEGIC OBJECTIVES:

Develop a strategy in partnership with First Nations, Inuit, Métis and Urban Indigenous people to improve their kidney care

Reduce barriers to accessing services for people with health inequities, including in rural and remote locations

Efficient

STRATEGIC OBJECTIVES:

Improve coordination of care between renal programs and partners in primary, home and community care

Optimize system and capacity planning, funding models and data collection to support efficient use of resources

Effective

STRATEGIC OBJECTIVES:

Strengthen Ontario's renal system as a learning health system through implementation, continuous evaluation and knowledge translation

Enhance quality standards for acute and chronic in-facility dialysis

Strengthen care delivery for patients with glomerulonephritis and women with chronic kidney disease requiring maternal healthcare

Timely

STRATEGIC OBJECTIVES:

Increase access to kidney transplantation with a focus on living kidney donor transplants

Ensure access to high-quality care in multi-care kidney clinics

In time, the work of Ontario Renal Network will be taken on by Ontario Health. Ontario Health is a single health agency that will oversee healthcare delivery, improve clinical guidance and support providers to ensure better quality care for patients.
